SUMMARY

Final year Computer Science and Engineering student with hands-on experience in Python, full-stack development, machine learning, and computer vision. Seeking opportunities to apply my skills in a professional environment, take on meaningful technical challenges, and grow through practical experience and collaboration with experienced teams.

EXPERIENCE

Python Full Stack Developer

Infosys Springboard **July 2026 - August 2026, Virtual**

- Developed a full-stack low-code workflow automation platform with AI-powered form generation, drag-and-drop workflow design, multilingual support, and workflow management.
- Built and integrated REST APIs using FastAPI and PostgreSQL, along with Firebase Authentication for secure user access and data management.
- Integrated Grok AI API for intelligent form generation and implemented multilingual functionality using React-i18next and IndicTrans.

PROJECT

DesertVision — Safe Route Planning & Real-Time Navigation Simulation system

github.com/TanishqMehta10/DesertvisionAI • August 2026 - October 2026

- Developed a rover navigation simulation using React, FastAPI, CesiumJS, and Leaflet with interactive 2D/3D maps and real-time telemetry.
- Implemented AD* Lite route planning and DWA navigation with terrain, slope, building, and water safety checks.
- Integrated OpenStreetMap, satellite imagery, TomTom traffic, GDACS disaster alerts, and Open-Meteo weather for risk-aware routing.
- Built a FastAPI based simulation backend with WebSocket telemetry at 20 Hz, mission-state tracking, and real-time rover progress monitoring.

FlowMind AI – AI-Powered Low-Code Workflow Automation Platform

Infosys Springboard • github.com/TanishqMehta10/FlowMind-forms • July 2026 - August 2026

- Built a low-code workflow automation platform with AI-powered form generation, drag-and-drop workflow design, multilingual support, and workflow management.
- Integrated Grok AI API for intelligent form generation, React-i18next and IndicTrans for multilingual support, and Firebase Authentication for secure user access.
- Transformed manual form creation into an AI-assisted workflow by integrating AI-powered form generation, automated workflows, and a visual drag-and-drop form builder into a full-stack platform.

SKILLS

Programming Languages: Python, C, SQL

Web Development: HTML5, CSS3, React.js, FastAPI, Firebase

AI & Machine Learning: PyTorch, Scikit-learn, OpenCV, NumPy, Pandas

Databases: PostgreSQL, MySQL

Developer Tools: Git, GitHub, Vercel, Render

EDUCATION

Bachelor of Technology in Computer Science and Engineering.

Minor in Electronics and Telecommunication Engineering. • Walchand Institute of Technology • Solapur • 2027 • 8.81

CERTIFICATIONS

WebTopia Event Coordinator

Walchand Institute of Technology, Solapur • 2026

Software Engineering and Agile software development

Infosys Springboard • 2026
