SUMMARY

Python developer with expertise in data structures and algorithms, machine learning fundamental with an interest in team leadership and collaborative development.

PROJECT

Stock Trading Decision System using Q-Learning

github.com/TanishqMehta10/Stock-Trading-Decision-System-using-Q-Learning • April 2026 - April 2026

- Developed an AI-driven stock trading system that learns optimal buy, sell, and hold decisions using reinforcement learning on historical market data.
- Built using Python, Q-Learning (Reinforcement Learning), Pandas, NumPy, yfinance API, Matplotlib, and Streamlit for interactive visualization.
- Implements a custom trading environment where the agent interacts with real stock data, learns via reward-based Q-value updates across episodes, and generates trading decisions with performance visualized through profit trends and dashboards.

Multimodal Fake Media Detection System

github.com/TanishqMehta10/Multimodal-Fake-Media-Detection-System • March 2026 - April 2026

- Developed a multi-modal deepfake detection system that identifies manipulated images and videos using AI-based analysis.
- Built using Python, FastAPI, React.js, PyTorch, OpenCV, and EfficientNet CNN models for real-time media analysis.
- Implements frame extraction, face detection, and deep learning-based classification to detect fake content, generate authenticity scores, and visualize manipulated regions using heatmaps.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Minor in Electronics and Telecommunication Engineering • Walchand Institute of Technology • Solapur • 2027 • 8.81

SKILLS

Programming Languages: Python, Java, C

Core Concepts: Data Structures and Algorithms

Machine Learning: Supervised Learning, Unsupervised Learning, Reinforcement Learning

Web Development: HTML, CSS, JavaScript, React.js, Node.js

Database: MySQL

Tools & Platforms: Git, GitHub, Visual Studio Code, Anaconda, Render

CERTIFICATIONS

Complete Data Science, Machine Learning, DL, NLP Bootcamp

Udemy • 2026

- Developed understanding of core python, machine learning, deep learning, and NLP concepts
- Gained exposure to model building and basic use of standard ML tools and techniques
- Understood the fundamentals of model training, evaluation, and performance improvement

INVOLVEMENT

Event Coordinator

Walchand Institute of Technology • Walchand Institute of Technology • February 2026 - February 2026

- Coordinated the UI/UX design competition, managing participant flow ensuring smooth execution across all event stages.
- Collaborated with team members to organize and execute a two-round evaluation process, including an MCQ-based technical screening and a 3-hour web design challenge.
